- 1.) Please print out foot size using three letter size pages. Fold page one precisely along green center line. Place fold precisely on green line of page two. Tape page one and page two firmly together.
- 2.) Use an inch or cm ruler to check the side measurements of taped page for accuracy.
- 3.) While sitting, place your foot on the shaded foot area. Every person has a different foot size, as do a dancer's left and right feet often differ. But your foot should fit within the length. Some dancers add an additional $\frac{3}{8}$ inch or about 0.8 cm to accommodate the Ms. Stomper's tapered toe. If your current shoe has a removable insole cushion, place it on the graphic for more fit information.
- 4.) When you put on shoes, the width of your foot will contract slightly, as it conforms to the interior of the shoes. So if your foot goes slightly over the side lines, that size could still fit you.
- 5.) Check width through the heel, as Ms. Stomper has a somewhat narrow heel.
- 6.) The installed heel tap size is depicted at lower left on page one.
- 7.) Select the size that seems to optimally accommodate your foot.
We cannot guarantee that a given shoe size will fit your foot. But this visual foot size approximation should help you to find the best shoe size. All properly manufactured shoes will have some variations. This is why we offer shipping exchange options, according to details listed on the web site. Call toll free at 1-800-722-8040 (overseas: 1-724-662-0808) with questions.
- 8.) Ms Stomper drawings are taken from the shoe insole cushion.
